

## Evaluation of seizure in child with known epilepsy *Breakthrough Seizure*

### When to call the resident

- Patient not back to baseline neurologic status
- Recurrent or prolonged seizures
- Advice re: anticonvulsant dose adjustment

### Scheduling

- Patient can be seen in ER at 8 AM by on call neurology attending
- Patient can be scheduled into neurology clinic in 1-2 days
- Ad hoc must always be done
- May also leave message on voice mail:

Debbie Roybal, admin assistant child neurology division (272-3152)
